

A Hard Blow to Hardware Dealers

isn't it, to face a customer, wanting a Screw Driver "that can't be beat"—and then, unwillingly, hand him one of many he himself has "beaten to smithereens" in ordinary work?

It is otherwise with

"Thomson's Indestructible" Screw Driver

It's the "toughest proposition" for sledge-hammer—the best proposition for you

Because

even a severe blow with a sledge-hammer will not cause it to lose its identity—break or bend it or split its handle—it'll still be Thomson's "Indestructible"

We don't just say it's indestructible—we **guarantee** its being so, because it's drop forged throughout from the best steel,—cap, ferrule and blade, which is of one piece, extending through the handle.

Sizes 2½ to 30 inches.

One trial will convince you quicker of its selling qualities than a barrel of talk.

We weren't ready last year to sell you all you wanted but are

**Now Ready to Fill
all Orders Promptly**

Send for particulars and prices.

MENTION HARDWARE

Thomson Drop Forge Co.

Plantville, Conn.
